NEXT QUARTER

In 4Q24, we expect as follows;

VIBHA: net income to be significantly lower QoQ, and relatively the same YoY because of

- seasonally high number of patient in 3Q24
- gain on fair value measurement of financial assets in 3Q24

CMR: net income to be relatively lower both QoQ and YoY because of

- seasonally high number of patient in 3Q24
- lower dividend income in 4Q24

VBR: share profit to be relatively lower QoQ and significantly higher YoY, due to the the provisions for SSO recall in 4Q23

Overall: significantly lower net income QoQ and relatively the same YoY

NEXT YEAR

In 2025, we expect the total net income to be relatively higher than 2024 because of the following reasons;

VIBHA: higher registered beds starting in 3Q24, offset with loss from fixed costs of new hospital in the initial phase (Rama 2)

CMR: gradually improved revenue filling in the increased capacity from new hospital buildings

VBR: less impact from SSO recall and expected more on-time reimbursement for severe decease (DRG>2)
